

Hot Press Heat Transfer Machine, 16 in x 24 in, 220V Digital Temperature Control

- 16 in x 24 in pressing surface for garment and substrate transfers
- Rated for 240V operation
- Digital temperature control for precise heat setting
- Integrated timer for consistent press duration management
- Durable construction suited to sustained professional use
- 1-year warranty coverage

OVERVIEW

The EQ-HP24-220V is a 16 in x 24 in heat press machine rated for 220V operation, intended for professional heat transfer applications in small commercial and production environments. It is designed for operators who require repeatable results across garment decoration, substrate transfers, and similar pressing tasks.

The unit features digital temperature control for precise heat setting and an integrated timer for consistent press duration management. The construction is described as durable and suited to sustained professional use.

The machine carries a 1-year warranty.
