

Die Set for Manual Grommet Punch, Size #1, Interchangeable Plates

- Interchangeable die plates accommodate different grommet sizes
 - Constructed from high-quality materials for durability
 - Ergonomic handle supports repeatable use during production runs
- Suitable for fabric-based materials including banners and curtains
 - Backed by a 1-year warranty

OVERVIEW

The Die Set for Manual Grommet Punch, Size #1 is a precision tooling accessory designed for installing grommets in fabric-based materials. It is commonly used in the production of signage, banners, and curtains, making it a practical addition to sign shops, small fabrication businesses, and professional installation workflows.

The die set is constructed from high-quality materials for durability and includes interchangeable die plates to accommodate different grommet sizes. The design supports quick installation across a range of material types, and the ergonomic handle facilitates efficient, repeatable use during production runs.

The die set carries a 1-year warranty.
