

Flange Bending Machine for Channel Letter Fabrication, Adjustable Settings, 1 - Year Warranty

- Automates flange bending for channel letter production
- Adjustable settings accommodate varying flange specifications
- Automation reduces cycle time while maintaining dimensional accuracy
- Built for durability in continuous production use
- Backed by a 1-year manufacturer warranty

OVERVIEW

The EQ-ZLZB-DD is a flange bending machine designed specifically for channel letter fabrication. It automates and streamlines the flange bending process to support consistent, precise output in sign production environments.

The machine includes adjustable settings to accommodate varying flange specifications and is built for durability in production use. Automation features are incorporated to reduce cycle times while maintaining dimensional accuracy across runs.

The unit is backed by a 1-year warranty.
