

Replacement Motion Sensor for LED Flood Light, 1 - Year Warranty

- Replacement part for compatible LED flood light fixtures
- Restores motion-activated operation without replacing the entire fixture
- Rated for use with fixtures carrying a 50,000-hour LED lifetime
- Backed by a 1-year warranty

OVERVIEW

The F-Z-Sensor is a replacement motion sensor designed for use with compatible LED flood lights. It is intended for installations where the original sensor requires replacement, allowing the fixture to maintain motion-activated operation without full fixture replacement.

The sensor is rated for use with flood light systems carrying an LED lifetime of 50,000 hours, supporting continued motion-activated performance over the extended service life of the fixture.

The component is backed by a 1-year warranty.
