

French Riviera Waterproof WPC Flooring
12mm, HocPoint Finish, 0.79 ft x 5 ft Planks

- Wood Polymer Composite construction for dimensional stability
- 12mm plank thickness for interior flooring applications
- Waterproof environmental rating for moisture-prone areas
- IP40 rating for solid particle ingress protection
- Plank dimensions of 0.79 ft x 5 ft per unit
- HocPoint finish for consistent surface appearance

OVERVIEW

The French Riviera Waterproof WPC Flooring is a Wood Polymer Composite plank product designed for commercial and residential interior flooring applications where moisture resistance is a primary requirement. Each plank measures approximately 0.79 ft in width and 5 ft in length, with a 12mm thickness and HocPoint finish suited for high-traffic or moisture-prone environments.

With an IP40 rating, this flooring is suited for indoor installations where protection against solid particle ingress is required. The WPC construction provides dimensional stability and resistance to moisture-related expansion and contraction common in standard wood flooring, and the waterproof environmental rating supports use in areas subject to occasional moisture exposure.

SPECIFICATIONS

MECHANICAL

Product Dimensions	0.79×5ft
Finish	Hoc Point
Material	Wood Polymer Composite WPC
Weight	50 lb

ENVIRONMENTAL

IP Rating	IP40
Environmental Rating	Waterproof

APPLICATIONS
