

French Riviera Reducer — 2 in. Width, 7 ft. Length

- Trim accessory for flooring transitions and width reduction
- 2 in. width for standard reducer edge applications
- 7 ft. length suited to long-run commercial installations
- Designed for architectural finishing where edge consistency matters

OVERVIEW

The French Riviera Reducer is a trim accessory designed to transition between surfaces or profiles where a width reduction is required. It fits commercial and architectural flooring installations where a change in surface height or material needs a finished edge.

The reducer measures 2 in. in width and 7 ft. in length, providing a consistent transition profile suited to long-run flooring installations.

SPECIFICATIONS

MECHANICAL
