

Innova WPC Collection Reducer Molding, 2 in. Width, 7 ft. Length

- 2 in. width provides a compact profile for transition areas
- 7 ft. length covers standard doorway and room-transition spans
- Made from WPC (wood-plastic composite) material matching the Innova line
- Designed to pair with Innova WPC flooring or wall panel systems

OVERVIEW

The Innova WPC Collection Reducer is a trim accessory designed for use with the Innova WPC flooring or wall panel system. At 2 in. wide and 7 ft. in length, it provides a finished transition between surfaces of differing heights or profiles.

Constructed from wood-plastic composite (WPC) material consistent with the Innova WPC product line, the reducer supports clean, professional installations where flooring or panel surfaces meet at varying elevations, such as doorways or transitions to adjoining rooms.

Its fixed dimensions of 2 in. width and 7 ft. length allow for straightforward planning and cutting to fit typical residential and commercial layouts.

SPECIFICATIONS

MECHANICAL

Product Dimensions	2 in x 7 ft
Length	2.13 m 7.0 ft
Material	Wood-Plastic Composite (WPC)

APPLICATIONS

- Flooring height transitions
- Doorway thresholds
- Wall panel edge transitions
