

Chrome Grommet #22, 13.5mm Outer / 8mm Inner Diameter, 1000-Pack

- Chrome finish for a clean, corrosion-resistant appearance
- 8mm inner diameter for standard wire and cable routing
- 13.5mm outer diameter fits common panel cutouts
- Packaged in bulk quantity of 1,000 pieces per unit
- 1-year warranty coverage on materials

OVERVIEW

The GR22 is a #22 chrome grommet designed for sign fabrication, panel installations, and cable management applications where a finished, protected opening is required. With an 8mm inner diameter and 13.5mm outer diameter, it provides a secure fit for routing wires or cables through sheet metal, acrylic, and similar substrates. Supplied in a 1,000-piece pack, this grommet is suited for contractors and installers working on high-volume projects.
