

LED Dance Floor Protection Ramp, Covers Up to 1.64 Linear Feet per Section

- Covers up to 1.64 linear feet of floor edge per ramp section
- Designed specifically for LED dance floor panel systems
- Creates a beveled transition edge to reduce trip hazards
- Protects panel edges from foot traffic and rolling loads

OVERVIEW

The LB-FL-RAMP is a protection ramp designed for use with LED dance floor systems. It provides a safe transition edge at the perimeter of an installed dance floor panel layout, reducing trip hazards and protecting panel edges from foot traffic and rolling loads.

Each ramp section covers up to 1.64 linear feet of floor border, allowing multiple units to be joined to frame the full perimeter of a dance floor installation.

SPECIFICATIONS

MECHANICAL
