

Receive Card for LED Display Control Systems, 1 - Year Warranty

- Functions as receive card within LED display signal chain
- Distributes data from sending card to LED modules or cabinets
- Rated for LED lifetime of 50,000 hours
- Backed by 1 - year manufacturer warranty

OVERVIEW

The LEDS-R.Card is a receive card designed for use in LED display control systems. It functions as a core communication component within the display signal chain, receiving data from a sending or control card and distributing it to the LED modules or cabinets in the array.

The unit is rated for an LED lifetime of 50,000 hours and is backed by a 1 - year warranty.
