

Fixing Clip for 12mm Flex Strip,
Compatible with M-H57 and M-H-28

- Sized for 12mm flex strip width
- Compatible with M-H57 and M-H-28 flex strip series
- Constructed from high-quality materials for long-lasting durability
- Secures flex strip to prevent loosening or detachment
- Compact form factor suited to tight or confined installation spaces

OVERVIEW

The M-H-12mm-CLIP is a fixing clip designed to secure 12mm flex strips, specifically compatible with the M-H57 and M-H-28 flex strip series. These clips are intended for professional lighting installations where a reliable, clean attachment to various surfaces is required.

Constructed from high-quality materials, the clips are built for long-lasting durability and are designed to hold flex strips firmly in place without loosening or detaching over time. Their form factor accommodates installation in tight or confined spaces, making them practical for a range of commercial and architectural applications.

The associated flex strip carries a 50,000 hour LED lifetime rating and a 1 year warranty.
