

90-Degree Connector for M-HL RGB and Single Color LED Strip Lights

- Provides 90-degree right-angled connections between LED strip segments
- Compatible with M-HL RGB and single-color LED strip configurations
- Eliminates the need for cutting or soldering during directional changes
- Rated for use with LED strips carrying a 50,000-hour LED lifetime
- Backed by a 1-year warranty

OVERVIEW

The M-HL-50-CN is a 90-degree connector designed for use with M-HL series RGB and single-color LED strip lights. It provides right-angled connections between strip segments, making it a practical solution for installations that require directional changes without cutting or soldering. The connector is intended for trade and contractor use where clean, efficient wiring is a priority.

Built for compatibility with the M-HL strip light lineup, the connector is compact in form and designed to maintain reliable electrical contact in both RGB and single-color configurations. It is suited for reducing installation time in commercial and architectural lighting applications, and is backed by a 1-year warranty.
