

180 Degree Connector for LED Light Roll, 1 - Year Warranty, 50,000 h Rated

- Forms a 180-degree junction between LED light roll segments
- Rated for 50,000 hours of LED lifetime at the connection point
- Backed by a 1-year warranty
- Durable construction supports extended field use
- Compatible with various light roll systems for flexible layout design

OVERVIEW

The M-HL-CON-180 is a 180-degree connector designed for joining LED light rolls in commercial and professional lighting installations. It provides a continuous electrical and mechanical connection between roll segments, supporting a cohesive lighting layout without interruption or flickering at the junction point.

Constructed for durability, the connector is engineered to maintain a secure, reliable connection over extended use. Its design is compatible with various light roll systems, making it a practical component for contractors and installers working across multiple project types or venues.
