

SMD2835 High Voltage LED Strip Light, 120 Chips/m, 6000K, 10W/m

OVERVIEW

The M-HR-2835-120-60K is a high-voltage SMD2835 LED strip light operating on AC 120V, designed for continuous-run commercial and architectural lighting installations. With 120 LEDs per meter and a 6000K correlated color temperature, it is suited for perimeter lighting, cove lighting, signage backlighting, and general accent applications in both indoor and outdoor environments.

The strip delivers 900 lumens per meter at 10W per meter, with a 120-degree beam angle and a CRI greater than 80. Rated IP66, it is protected against dust ingress and high-pressure water jets, making it appropriate for exposed exterior installations. Operating temperature range spans -25°C to +45°C (-13°F to +113°F). Strip is cuttable at 50cm or 100cm intervals and is available in 50-meter rolls.

This product carries ETL and RoHS certifications, confirming compliance with applicable North American safety and environmental standards. Installers should reference the product manual prior to installation and ensure all AC terminal connections are handled by qualified personnel. Verify warranty terms with your distributor at time of purchase.

SPECIFICATIONS

Power	10 W/m	IP rating	IP66
Luminous flux	900 lm/m	Input voltage	120 V AC
CCT	6000 K	Dimensions	12mm W x 5mm H
CRI	80	Weight	3.5 kg/roll
Beam angle	120 °	Operating temp	-25 to +45 °C

INSTALLATION
