- Sized 10×20mm to fit M-N10 neon strip ends
- No - hole design simplifies installation and sealing
- Made of high - quality silicone for durability
- Sold per unit for precise quantity ordering
- Backed by a 1 year warranty

OVERVIEW

The M-N10S-Cap is a silicone end cap designed specifically for M-N10 neon strip, providing a secure, form-fitting seal at the terminal ends of the run. Its primary function is to protect the exposed end of the neon tube from dust and moisture ingress during installation and long-term service.

Constructed from high-quality silicone, the cap features a no-hole design that eliminates the need for additional sealing steps and simplifies installation. Units are sold individually, allowing contractors to order the exact quantity required for a given project.
