

Aluminum Channel for M-N10 Silicone Neon Rope Light, 40 in. (1 m)

- Aluminum construction for structural support and durability
- Length of 40 in. (1 m) per channel section
- Designed specifically for M-N10 silicone neon rope light
- Ships without pre-drilled holes for custom mounting placement
- Suitable for indoor and outdoor lighting installations

OVERVIEW

The M-N10S-Ch-1m is an aluminum mounting channel designed specifically for use with the M-N10 silicone neon rope light. At 40 in. (1 m) in length, it provides structural support and a clean finished appearance for both indoor and outdoor lighting installations. The channel is engineered to accept the M-N10 rope light without modification, ensuring a secure, precise fit.

Constructed from aluminum, the channel is suited for a range of architectural applications and blends with varied installation environments. It ships without pre-drilled holes, allowing contractors and installers to position mounting points according to project-specific requirements.

SPECIFICATIONS
