

Pin Connector for M-N11 Flexible Neon, 10mm, 1-Year Warranty

- Compatible with M-N11 flexible neon lighting systems
- Sized for 10mm flex neon connection interface
- Rated to support 50,000-hour LED lifetime components
- Backed by 1-year manufacturer warranty
- Sleek interface designed for easy installation and customization

OVERVIEW

The M-N11-Pin-10mm is a pin connector designed specifically for use with M-N11 flexible neon lighting. It provides a secure power and signal connection between the flex neon strip and its power source, supporting straightforward installation and system customization in commercial and architectural lighting applications.

Constructed for durable, long-term use, this connector is engineered to maintain a reliable interface with M-N11 flex neon components rated for a 50,000-hour LED lifetime. Its design accommodates easy handling during installation, reducing setup time in both new construction and retrofit scenarios.

The connector is backed by a 1-year warranty.
