

12mm End Cap with Hole for M-CH-N12 Chase LED Strip

- Fits 12mm M-CH-N12 chase LED strip end termination
- Includes a hole for wire or connector pass-through
- Rated for 50,000 hour LED lifetime compatibility
- Backed by a 1 year warranty

OVERVIEW

The M-N12-Chase-Cap-H is an end cap with a wire pass-through hole designed specifically for the M-CH-N12 12mm chase LED strip. It provides a finished termination point at the end of a strip run while allowing a wire or connector to exit the housing, supporting clean terminations in architectural, signage, and accent lighting installations.

The accessory is rated for a 50,000 hour LED lifetime consistent with the M-CH-N12 strip system and is backed by a 1 year warranty.
