

End Cap for M-N15 Flexible Neon LED Strip, Moisture and Dust Resistant

- Purpose-built end cap for the M-N15 Flexible Neon LED strip system
- Resists moisture and dust to protect the open end of the run
- Precise fit simplifies installation and maintenance access
- Supports rated LED lifetime of 50,000 hours for the M-N15 system
- Backed by a 1-year warranty

OVERVIEW

The M-N15-Cap is an end cap designed specifically for the M-N15 Flexible Neon LED strip system. It provides a secure, finished termination point for the neon tube, protecting the open end of the run and maintaining the integrity of the overall installation. Suitable for architectural lighting, commercial displays, and creative signage applications.

Constructed from high-quality materials, the end cap is designed to resist moisture and dust, helping to extend the service life of the M-N15 system. Its precise fit allows for straightforward installation and simplifies maintenance when access to the strip end is required, supporting a rated LED lifetime of 50,000 hours.

Backed by a 1-year warranty.
