

Silicone LED Strip Light 3000K 8W/m 120 LEDs/m IP20 12V – 10M Kit

OVERVIEW

The M-NR6-30K-SILC-M is a silicone-body LED strip light kit designed for indoor applications including residential, commercial, and hospitality environments. The 10-meter kit uses SMD2835 chip technology encased in a silicone housing for durability and flexibility.

The strip operates at 12V DC and draws 8W per meter at a 3000K warm white color temperature with a CRI of 80. Chip density is 120 LEDs per meter. The IP20 rating is suitable for dry indoor installations. Certifications confirmed for this product include RoHS compliance.

SPECIFICATIONS

CCT	3000 K	Input voltage	12 V
CRI	80	Power	8 W/m
IP rating	IP20
