

Red Bendable LED Strip Light, 8W/m, SMD2835, 12VDC, 10m Roll

OVERVIEW

The M-NR6-R-LED-10M is a bendable red LED strip light supplied in a 10-meter roll, designed for indoor accent, cove, and architectural lighting applications where a narrow 6mm PCB profile is required.

The strip operates at 12VDC and draws 8W per meter, with an output of 400 lumens per meter using SMD2835 chips at a density of 120 LEDs per meter. The IP20 rating limits use to dry, indoor environments. The strip can be cut at 2.5cm intervals for custom lengths, and the silicone construction supports the flexible, bendable form factor.

This product carries RoHS compliance certification.

SPECIFICATIONS

LED chip	SMD2835	Input voltage	12 V
Material	Silicone	Chip density	120 LEDs/m
Power	8 W/m	Roll length	10 m
CRI	80	Certifications	CE, RoHS
IP rating	IP20
