

2-Pin 10mm L-Shape Female Connector for 3528/2835 Single-Color LED Strip Lights

- 2-pin design for single-color strip connections
- L-shape body suited to corner and tight-space transitions
- 10mm female connector width matches 3528/2835 strips
- Compatible with both 3528 and 2835 LED strip formats
- Backed by a 1-year warranty
- Rated for use with strips having a 50,000-hour LED lifetime

OVERVIEW

The M-Z-CON-L2-PIN is a 2-pin, 10mm L-shape female connector designed for joining single-color LED strip lights to a power source. Its L-shaped form factor accommodates installations where a straight connector would be impractical, making it suitable for corner transitions and space-constrained mounting configurations. Compatible with 3528 and 2835 single-color LED strip formats.

The connector provides a secure, reliable termination point for 10mm-wide single-color strip runs. The compact profile allows the connection point to be concealed within channel extrusions or behind trim without adding significant bulk to the assembly. Backed by a 1-year warranty and rated for use with strips carrying a 50,000-hour LED lifetime.

SPECIFICATIONS

OPTICAL

LED Lifetime 50,000 h

MECHANICAL

Strip Width 10 mm
0.39 in

ORDERING

Warranty 1 y

APPLICATIONS

- Corner transitions in LED strip runs
- Concealed connections within channel extrusions
- Cabinet and display case lighting joins
- Cove lighting installations requiring directional turns
