

L-Connector for 10mm IP20 RGB SMD 5050 LED Strip, Dual-End (5-Pack)

- Sized for 10mm wide SMD 5050 RGB LED strip
- L-shaped design enables right-angle strip-to-strip connections
- Solder-free installation for two-end strip connection
- Sold in a 5-piece pack for multiple connection points
- Compatible with strip rated for 50,000 hour LED lifetime
- Backed by a 1-year warranty

OVERVIEW

The M-Z-CON4-L is an L-shaped connector designed to join two ends of a 10mm wide IP20 RGB SMD 5050 LED strip. It is intended for installations where a right-angle connection between strip segments is required, allowing layout flexibility without soldering or additional wiring.

The connector provides a stable, secure connection between strip ends and supports expansion and customization of existing lighting setups. Its low-profile design avoids interference with the visual output of the connected strips.

Backed by a 1-year warranty, and compatible with strip rated for 50,000 hours of LED lifetime.

SPECIFICATIONS

OPTICAL

LED Chip Type	SMD 5050
LED Lifetime	50,000 h

MECHANICAL
