

Silicone Cable Ring for Panel Holes 9.5 - 10mm, 8mm Cable Diameter

- Fits panel holes from 9.5mm to 10mm in diameter
- Sized for cables with an 8mm outer diameter
- Molded from silicone for a flexible, form-fitting seal
- Backed by a 1 year warranty
- Rated for compatibility with LED systems specifying 50,000 hour lifetime

OVERVIEW

The MC-Cable-Ring is a silicone cable ring designed for use with electrical boxes and panel installations. It fits panel holes ranging from 9.5 to 10mm and accommodates cables with an 8mm diameter, creating a secure, form-fitting seal at the cable entry point to protect wiring from abrasion and reduce strain at the panel opening.

Constructed from silicone for flexibility and a tight grip around the cable, the ring is intended for use in panel or box assemblies where a clean pass-through is required. It carries a 1 year warranty.
