

Double-Sided Tape for Banners, 0.5 in. x 164 ft. (12mm x 50m), Weather-Resistant

- Double-sided adhesive bonds securely on both surfaces
- 0.5 in. (12mm) wide roll for precise banner seam application
- 164 ft. (50m) length supports multiple installations per roll
- Formulated for resistance to harsh weather conditions
- Backed by a 1-year warranty

OVERVIEW

The MC-DT-S.5 is a double-sided adhesive tape engineered for banner attachment applications. Supplied on a 0.5 in. (12mm) wide, 164 ft. (50m) roll, it is intended for contractors and installers requiring a reliable, professional-grade bonding solution across multiple installations.

The tape delivers adhesive strength on both sides and is formulated to perform across a range of surfaces. It is rated for resistance to harsh weather conditions, making it suitable for exterior banner installations where environmental exposure is a factor. The roll format allows for straightforward handling and efficient use across large or repeat projects.

The product carries a 1-year warranty for added assurance on installation projects.
