

# Red Hook Plastic Cutter for Sign Fabrication and Sheet Plastic Scoring

- Hook-style blade suited for scoring sheet plastics and films
- Backed by a 1-year manufacturer warranty
- Red-hook design for quick visual identification on job sites
- Suited for sign fabrication and lighting installation trades

## OVERVIEW

The MC-NF-106 is a red hook plastic cutter designed for cutting plastic materials in commercial and industrial applications. Its hook-style blade configuration is suited for scoring and slicing sheet plastics, films, and similar materials commonly encountered in sign fabrication and lighting installation work.

The tool is built for repeated use on job sites where sign panels and plastic components require field trimming or scoring prior to installation.

The product carries a 1-year warranty.
