

Double - Sided Squeegee Tool, 5 in. / 3 in. Edges, Yellow - Green, Vinyl Application

- 5 -inch working edge for broad surface coverage
- 3 -inch working edge for detail and trim work
- Yellow body paired with green edge dual - material construction
- Backed by a 1 -year warranty

OVERVIEW

The MC-SQ-04 is a double-sided squeegee tool designed for vinyl application and sign installation work. The dual-material construction combines a yellow body with a green edge, providing two working surfaces suited to different stages of the installation process.

The tool measures 5 inches on one working edge and 3 inches on the other, allowing the installer to switch between a wider stroke for large flat surfaces and a narrower edge for detail work, corners, and trim areas.

The MC-SQ-04 is backed by a 1-year warranty.
