- 2.5 in x 10 in transaction cutout for document or payment exchange
- Three-panel design joined with plastic hinges for freestanding support
- Side panels measure 30 in x 32 in with 15 in depth
- Kit includes two units per pack

OVERVIEW

The MD-SHIELD3032x2PK-Kit is a three-panel freestanding sneeze guard constructed from 4mm (5/32 in) thick acrylic (plexiglass). Designed for tabletop deployment, it is suited for reception desks, checkout counters, service windows, and similar transaction environments where a physical barrier between staff and the public is required. The kit includes two units per pack.

The front panel measures 30 in wide by 32 in tall and features a 2.5 in x 10 in transaction cutout to allow document and payment exchange without removing the barrier. The three-panel configuration is joined with plastic hinges, allowing the side panels to angle inward for a stable, self-supporting setup on flat surfaces without additional mounting hardware. Side panels measure 30 in x 32 in with a 15 in depth.

SPECIFICATIONS

MECHANICAL

Product Dimensions	30 × 32 in (front panel)
Material	Acrylic (Plexiglass)

APPLICATIONS

- Reception desk barriers
- Checkout counter shields
- Service window protection
- Tabletop transaction stations
