

GTO Neon Cable, 15KV Rating, White, 5mm Diameter, 75m (250 ft) Roll

- 15KV voltage rating for neon sign transformer connections
- White finish for exposed installation applications
- 5mm cable diameter construction
- Supplied in a 75-meter (250 ft) roll
- 50,000-hour rated service life
- Backed by a 1-year warranty

OVERVIEW

GTO Neon Cable 15KV White 5mm is a high-voltage neon sign cable designed for use in neon sign fabrication and installation. It is suited for connecting neon tubes to transformers in commercial signage applications where a 15,000-volt rated conductor is required.

This cable is supplied in a 75-meter (approximately 250 ft) roll and features a 5mm diameter construction in white. The 15KV voltage rating makes it appropriate for standard neon sign transformer outputs used in open-channel and exposed neon installations.

The cable carries a 1-year warranty and is rated for a 50,000-hour service life.

SPECIFICATIONS

OPTICAL

LED Lifetime 50,000 h
