

400W LED Power Supply, 110VAC
Input to 24VDC Output, Outdoor Rated

- Converts 110VAC input to 24VDC output
- Delivers 400 watts of continuous output power
- Suited for pool light and garden light installations
- Backed by a 1-year manufacturer warranty

OVERVIEW

The P-AC400-24 is a 400W AC-to-DC power supply that converts 110VAC input to 24VDC output. It is designed for outdoor and landscape lighting installations such as pool lights and garden lighting where a stable low-voltage DC supply is required.

This unit delivers 400 watts of output power at 24VDC, providing sufficient capacity for driving multiple LED fixtures from a single centralized supply point in commercial or residential landscape applications.

The power supply is backed by a 1-year warranty.
