

AC to DC Power Adaptor, 110V AC Input to 12V DC / 500mA Output

- Converts 110V AC input to regulated 12V DC output
 - Rated output current of 500mA
- 1 year manufacturer warranty
 - Suited to powering 12V DC LED drivers and control modules

OVERVIEW

The P-MV-5467 is an AC to DC power adaptor designed to convert 110V AC input to a regulated 12V DC output at 500mA. It is intended for use in commercial and light industrial applications where a stable low-voltage DC supply is required to power LED drivers, control modules, or similar equipment rated for 12V DC operation.
