

4 - Gang Blank Wall Plate, Night Black Finish

- 4 - gang configuration for multi - position electrical boxes
- Night Black finish for a uniform, finished appearance
- Blank design closes off unused device openings
- Suited for commercial and industrial installations

OVERVIEW

The PL-BK-4 is a 4 - gang blank wall plate finished in Night Black. It is used to cover unused multi - gang electrical boxes in commercial and industrial installations where no device or switch is installed.

The plate provides a clean, finished appearance across a 4 - gang opening, allowing property managers and contractors to close out unused wiring locations without leaving an open or unfinished box.
