

4 - Gang Wall Plate Cover, Bronze with Patina Finish

- 4 - gang configuration for four device openings under one plate
- Bronze finish with applied patina treatment
- Coordinates with dark - metal or period - style hardware schemes
- Suited for commercial and hospitality installations

OVERVIEW

The PL-BP-4 is a 4 - gang wall plate cover finished in bronze with a patina treatment, designed for multi - device electrical installations where a traditional or aged - metal aesthetic is required. It accommodates four device openings under a single cover for switches, receptacles or other wiring devices ganged together.

It is suited for commercial and hospitality environments where decorative wall plates must coordinate with period - style or dark - metal hardware schemes.
