

White 4 - Gang Wall Plate, Four - Device Cover

- Four-gang configuration covers four device openings in one plate
- White finish suits standard commercial and industrial wall finishes
- Single-cover design for grouped switch, outlet, or control installations

OVERVIEW

The PL-WH-4 is a white 4-gang wall plate designed for multi-device electrical installations in commercial and industrial environments. It provides a clean, finished cover for configurations requiring four switch, outlet, or control openings in a single plate.

The plate consolidates four device openings under one cover, simplifying wall finishing where multiple switches, receptacles, or controls are grouped together.
