

5 - Gang Wall Plate, White Finish

- 5-gang configuration for grouped device installations
- White finish for a uniform panel appearance
- Covers five switch, outlet, or control device openings

OVERVIEW

The PL-WH-5 is a 5-gang wall plate in a white finish, intended for multi-device electrical installations in commercial and industrial environments. It accommodates five switch, outlet, or control device openings under a single cover.

The plate provides a uniform, low-profile appearance for grouped wiring device configurations, supporting organized panel layouts where multiple devices are mounted together.
