- Compatible with Mimaki, Roland, and Mutoh eco - solvent printers
 - Rated for 50,000 hours of service life
- Regulates ink flow to maintain stable ink pressure
 - Reduces ink leakage and clogging during operation
 - Backed by a 1 - year warranty

OVERVIEW

The PT - Damper - JV5 is an ink damper designed for use with Mimaki, Roland, and Mutoh eco - solvent printers. It regulates ink flow to support consistent print output and is intended as a replacement or maintenance component for compatible printer models.

The damper is constructed to prevent clogging, reduce ink leakage, and maintain stable ink pressure during operation. It is rated for a 50,000 - hour service life and is designed to minimize ink waste and support accurate color reproduction, reducing downtime associated with printhead maintenance.

Backed by a 1 - year warranty for replacement or maintenance use.
