- Compatible with Mimaki, Roland, and Mutoh eco - solvent printers
 - Regulates ink flow to prevent clogging and maintain print quality
 - Medium size fits standard damper replacement points
- Durable construction suited to high - volume print operations
 - Backed by a 1 - year warranty
 - Rated for 50,000 h of service life

OVERVIEW

The PT - Damper - M is a replacement ink damper designed for use with Mimaki, Roland, and Mutoh eco - solvent printers. It regulates ink flow between the ink supply system and the print head, helping to prevent clogging and maintain consistent ink delivery during operation.

The damper is constructed for durability and is suitable for both small - run and high - volume print environments. Its design allows for straightforward installation and replacement, minimizing downtime during servicing.

The damper is backed by a 1 - year warranty.
