

Halo Series Woven Track System Linker, DC24V, IP20, Black, 30x22x10mm

OVERVIEW

The S-TK-HA-L-BK is a linker component for the Halo Series Woven Track System, designed to connect track sections in commercial and residential lighting installations. Suitable for use in offices, hotels, apartments, retail spaces, and workshops, it provides a clean, modern aesthetic in a compact black finish.

The linker operates at DC24V and is rated IP20, making it appropriate for dry indoor environments. It is constructed from PC material and carries a rated lifespan of 20,000 hours. Overall dimensions are 30x22x10mm.

This product is backed by a 2-year warranty. No third-party certifications are confirmed in available documentation.
