

## Woven LED Track System, DC24V, IP20, Black, 20m Roll

### OVERVIEW

The Halo Series Woven Track System (WOVEN TRACK-UT16-PD-20M) is a 20-meter roll of flexible, fabric-woven LED track designed for architectural and commercial interior applications. Suitable for installation in offices, hotels, apartments, retail environments, and workshops, it provides a clean, textile-based aesthetic for linear lighting layouts.

The track operates at DC24V and carries an IP20 environmental rating, making it appropriate for dry indoor installations. The woven fabric construction measures 20,000 × 16.5 × 3 mm over the full roll length. Rated lifespan is 20,000 hours. The track is finished in black.

This product carries a 2-year manufacturer warranty. No third-party certifications are confirmed in available documentation.
