

Prolink Track System Double Straight Connector – Black Finish

OVERVIEW

The Prolink Track System Double Straight Connector in black finish is a passive mechanical accessory designed to join two straight track sections within a compatible Prolink track lighting system. It is intended for commercial and retail installations where modular track layout continuity is required.

The connector measures 136 x 37 x 27 mm and is finished in black to coordinate with black-finish track components. No electrical output, wattage, or driver specifications apply to this connector, as it is a structural joining component only.

No certifications are confirmed in the available source data. Contractors should verify compatibility with the specific Prolink track system in use prior to installation.
