

## 2-Circuit Track Section, 40-Inch Length, White

### OVERVIEW

---

The S-TK2C-40 is a 2-circuit track section measuring 40 inches in length, designed for use with compatible track lighting fixtures in commercial and residential installations. The 2-circuit configuration provides added flexibility, allowing independent control of fixtures on separate circuits within a single track run.

Constructed for durability and finished in white, this track section integrates cleanly into ceiling environments where a low-profile, unobtrusive appearance is required.
