

3-Circuit Track Rail, 10 ft, Black

OVERVIEW

The S-TK3C-10-BK is a 10-foot, 3-circuit track rail designed for use with compatible track lighting fixtures in commercial and industrial installations. Its black finish suits a range of interior environments, and the 3-circuit configuration allows independent control of fixture groups along a single continuous run, supporting flexible lighting layouts in retail, warehouse, gallery, and office applications.

No electrical, mechanical, or environmental specifications were confirmed in the available source data for this rail. Contractors and specifiers should consult the manufacturer's documentation or contact Poli LED & Signs directly to verify amperage rating, conductor gauge, housing material, and compatibility with specific track heads before finalizing a specification.

No certifications, compliance listings, or warranty terms were confirmed in the available source data. Verification of UL listing status, code compliance, and applicable warranty coverage should be obtained from the manufacturer's official product documentation prior to procurement or installation.
