

3-Circuit Recessed Track, 10 ft., White

OVERVIEW

The S-TK3C-10M is a 3-circuit recessed track section measuring 10 ft. in length, finished in white. Designed for recessed mount installations, it is suited for commercial and residential applications including retail environments, art galleries, and general interior spaces. The 3-circuit configuration allows independent control of fixtures grouped on separate circuits along a single track run.

Compatible with a broad range of 3-circuit track lighting fixtures, this track section is intended to integrate into existing or new recessed track systems without requiring additional electrical connection hardware at the joiner points.
