

Track End Cap for 3-Circuit Light Track, White

OVERVIEW

The S-TK3CAP is a white end cap designed to terminate open ends of 3-circuit light track installations. It provides a clean, finished appearance at track termination points and is a standard accessory component for commercial and retail track lighting systems using 3-circuit track rail.

No dimensional, material, or performance specifications were confirmed in the available source data for this component. As a passive, non-electrical accessory, it carries no power, output, or environmental ratings to report.

No certifications, compliance listings, or warranty terms were confirmed in the available source data. Contractors and specifiers should consult Poli LED & Signs directly for compatibility confirmation with specific 3-circuit track systems prior to installation.
