

Middle Track Connector, Voltage
Input/Output, 1 - Year Warranty

- Supports both voltage input and output at one connection point
- Enables mid-run power supply or extraction within a track system
- Rated to support connected fixtures with 50,000-hour LED lifetime
- Backed by a 1-year manufacturer warranty
- Designed for flexible configuration and extension of track layouts

OVERVIEW

The S-TK3CN is a middle connector designed for use within track lighting systems, providing both voltage input and output capability at a single connection point. It is intended for applications where power must be supplied to or extracted from a track run, allowing installers to configure and extend track layouts with flexibility.

The connector supports connected fixtures rated for up to 50,000 hours of LED lifetime and is backed by a 1-year warranty.
