

Black Live End Connector for Recessed 3-Wire H-Type Track

OVERVIEW

The S-TK3CON-M-BK is a live end connector designed for recessed 3-wire H-type track systems. It provides the electrical feed point for compatible track runs and is intended for use in commercial and residential track lighting installations where a black finish is specified.

The connector features a black finish that coordinates with matching track components and fixtures, and is designed for secure electrical connection and straightforward field installation.
