

## White Live End Connector for Recessed 3-Wire H-Type Track

### OVERVIEW

---

The S-TK3CON-M is a white live end connector designed for recessed 3-wire H-type track lighting systems. It serves as the feed point where power is introduced to the track, and is compatible with a wide range of H-type track fixtures. The white finish allows it to integrate cleanly into ceiling surfaces across residential, commercial, and retail installations.
