

## Black Floating Canopy for 3-Wire H-Type Track Lighting

### OVERVIEW

---

The S-TK3CP-BK is a floating canopy designed for use with 3-wire H-type track lighting systems. It provides a ceiling mounting point for compatible track sections, supporting fixture installation in commercial and residential lighting applications where a clean, surface-mounted entry point is required.

Finished in matte black, the canopy is suited for installations where a consistent aesthetic across track components is a priority. It is compatible with standard H-type 3-wire track configurations.
