

3-Way T Connector for LED Strip Lighting Systems

OVERVIEW

The S-TK3T is a 3-way T connector designed for use in LED strip lighting systems. It provides a junction point that allows a single LED strip run to branch in two directions, supporting flexible layout configurations in commercial and industrial installations such as cove lighting, display case illumination, and architectural accent applications.

No dimensional, electrical, or environmental specifications were confirmed in the available source data for this SKU. Contractors and specifiers should contact Poli LED & Signs directly to obtain verified ratings for voltage compatibility, current capacity, IP rating, and conductor configuration before incorporating this connector into a specification or installation.

No certifications, compliance listings, or warranty terms were confirmed in the available source data. Verified documentation should be requested prior to use in applications subject to NEC, UL, or local authority having jurisdiction (AHJ) requirements.
