

4-Way Cross Connector for LED Track Lighting Systems, 1-Year Warranty

- Connects four track sections at a single junction point
- Compatible with standard track lighting materials
- Supports LED fixtures rated for 50,000 hours of operation
- Simplifies layout planning for multi-directional track runs
- Backed by a 1-year manufacturer warranty

OVERVIEW

The S-TK3X-BK is a 4-way cross connector designed for use in LED track lighting systems, providing a secure junction point where four track sections meet. It is suited for commercial and industrial installations requiring flexible layout configurations.

Constructed for durability, the connector is compatible with standard track materials and is designed to withstand the demands of typical installation environments. Its configuration simplifies layout planning and supports straightforward field installation.

The connector is backed by a 1-year warranty.
